

Company Overview

Acme Retail is a mid-market e-commerce company specializing in home furnishings, kitchenware, and lifestyle products. Founded in 2014 and headquartered in Amsterdam, Netherlands, Acme operates localized online stores in 8 European markets (NL, DE, BE, FR, AT, CH, UK, ES). Annual revenue reached €48M in 2025, with an average order value (AOV) of €62 and a returning customer rate of 38%. Acme Retail is a portfolio company of Horizon Capital Partners.

Business Objectives

Acme Retail's 2026 objectives center on profitable growth: increase online revenue by 25% to €60M while maintaining a minimum blended ROAS of 3.0x across all paid channels. Secondary goals include growing the first-time buyer share from 62% to 55% (indicating higher retention), increasing AOV from €62 to €70 through cross-sell campaigns, and expanding the German market to represent 30% of total revenue (currently 22%).

Target Audience

Primary persona: style-conscious homeowners aged 28–45, household income €50K+, who shop online for curated home decor and kitchen products. They value sustainability, quality craftsmanship, and design-forward aesthetics. Secondary persona: gift buyers (25–55) shopping for occasions (birthdays, housewarmings, holidays), typically entering through Google Shopping or social ads. Geographic weighting: NL 25%, DE 30%, BE/FR 20%, UK 15%, Other 10%.

Paid Media Strategy

Xebia manages Acme Retail's full paid media portfolio across Google Ads (Search, Shopping, Performance Max), Meta (Instagram, Facebook), and display/retargeting networks. Monthly media budget: €85,000–€105,000, with seasonal peaks in Q4 (Black Friday / Holiday) and Q2 (Spring Home Refresh). Channel allocation: Google Shopping (30%), Brand Search (15%), Competitor Search (12%), Prospecting Display (18%), Retargeting Display (15%), Social (10%). KPI targets: blended ROAS $\geq 3.0x$, Retargeting ROAS $\geq 4.0x$, Prospecting CPA $\leq €30$, CTR $\geq 2.0\%$ (Search), CTR $\geq 0.8\%$ (Display).

Key Campaigns

Brand Search: always-on campaign capturing brand queries and brand + category combinations. Shopping – Google: product feed campaigns segmented by category margin (high-margin categories get higher bids). Prospecting – Display: awareness campaigns on Google Display Network targeting in-market home decor audiences. Retargeting – Display: 7/14/30-day retargeting windows with dynamic product ads showing recently viewed items. Competitor – Search: targeted bidding on competitor brand terms with differentiation-focused ad copy. The Shopping and Retargeting campaigns are referenced in the weekly campaign reports as the primary efficiency drivers.

Reporting Cadence

Weekly performance reports are delivered every Monday by 09:00 CET, covering the prior Monday–Sunday period. Reports follow the standard Xebia weekly report template and include KPI summary tables, executive summaries, top wins, areas for improvement, and recommended actions. Monthly business reviews include a creative performance audit, budget pacing analysis, and competitive landscape update. Quarterly strategy reviews align with Acme Retail's merchandising calendar and seasonal promotional schedule.

Attribution and Measurement

Acme Retail uses a last-click attribution model in Google Analytics 4 (GA4) as the primary source of truth for ROAS and CPA reporting. A supplementary data-driven attribution model in GA4 is used for monthly business reviews to capture cross-channel effects. Offline returns are excluded from revenue reporting. The Xebia data team cross-references platform-reported conversions with GA4 to reconcile discrepancies (typically 8–12% variance on Meta). All weekly reports use GA4 last-click numbers.

Stakeholders

Client side: Sophie van den Berg (VP Marketing, final budget approver), Lukas Hoffmann (Digital Marketing Manager, day-to-day contact), Emma de Vries (E-commerce Analyst, data and attribution). Xebia side: Marco Rossi (Account Director), Annika Bauer (Paid Media Lead), David Chen (Data Analyst). Note: Marco Rossi and Annika Bauer also manage the TechNova and GreenLeaf Organics accounts, enabling cross-client learning.
